

<b>Course Number:</b> CS-TOP	<b>Title:</b> Implementing Towards Optimized Practice (TOP) in Wolf
<b>Province:</b> Alberta	<b>Role:</b> All Wolf Users who will Use TOP Checklists as part of the Health Screen in ACT10N campaign
<b>Length:</b> 3.5 hours	<b>Mode:</b> Remote or Onsite
To book your customization services and training, please email <a href="mailto:sales@wolfmedical.com">sales@wolfmedical.com</a> or call us at 1-866-879-9653, press '2.'	

For Alberta physicians enrolled in the Toward Optimized Practice (TOP) quality improvement initiative, the Health Screen in ACT10N campaign, we've put together a new customization and training package to implement the TOP templates (checklists). In this program we will:

Implement the SOAP templates for tracking TOP Health Screen in Action Maneuvers	Two SOAP Templates will be implemented to allow tracking of the key Maneuvers. These are (TOP) Screening – Female and (TOP) Screening – Male  Within a SOAP template, these checklists will then be accessible from the “Template Search” drop-down.
Implement the Flowsheet for tracking of Health Screening Maneuvers	Once information is entered into the SOAP note, any relevant results can be tracked on the (TOP) Health Screening flowsheet. The flowsheet will display all relevant results over time.
Import a series of Rules/Searches to track Health Screening Maneuvers	The final tool for tracking screening maneuvers is a series of searches/rules that are automatically loaded in to the clinic database. These rules are set up to run automatically every 24 hours and will attach flags to individual patient charts. The searches can be manually run from Practice Search to get lists of patients due for individual screening maneuvers.
Train TOP Physicians	Once we've completed the customization services to set up your TOP checklists and the extended functionality within Wolf to support it, we will train the physicians on how to use these checklists, the flowsheets, and generate patient lists.

### TOP Customization Services & Training Course Background

The Health Screen in ACT10N campaign is based on evidence that the use of checklists dramatically increases the reliability with which appropriate screening maneuvers are conducted or ordered by 20%, thereby increasing the effectiveness of periodic health exams (or equivalent). The campaign provides physicians with the ability to see where they are at prior to using these checklists and to assess the positive impact a formal checklist has on screening their patients. Wolf has worked with TOP to build the TOP checklists directly into Wolf Medical Suite; this will be an advantage for Wolf physicians enrolled in the Health Screen in ACT10N campaign as it will be easy to track checklist usage and any improvements in early detection of serious illness in adults. We expect that in addition to the benefits to patient care over time the use of the TOP checklists will save physicians time in subsequent patient encounters.

For more information about the TOP campaign or to enroll in the campaign, contact TOP directly at [www.topalbertadoctors.org](http://www.topalbertadoctors.org), e-mail TOP at [healthscreen@topalbertadoctors.org](mailto:healthscreen@topalbertadoctors.org) or call TOP toll-free at 1.866.505.3302.
