

Wolf Scheduler

Intuitive electronic scheduling.

Highlights of Wolf Scheduler

- Enter data once, find it in all Wolf EMR modules. Scheduled appointments are automatically transferred to Wolf Billing, saving time and increasing billings; physicians can see and book appointments from the Physician WorkDesk
- Supports the scheduling requirements of small and large clinics as well as community health centres, in single or multiple locations
- Schedule appointments, resources and manage physician and other allied health providers' schedules from one central location
- Intuitive user interface allows easy navigation forward and backward through the schedule by day, week, or month
- Fully customizable for visit lengths, length of day, time types
- Use "Smart Prompts" to ensure information is entered accurately and completely to increase billings

Wolf Scheduler is an intuitive electronic scheduling program designed to meet the needs of busy clinics and health centres. Wolf Scheduler handles all your appointment, resource, and scheduling requirements from a single central location. Whether your practice is large or small, in single or multiple locations, Wolf Scheduler makes scheduling and resource management fast and easy.

Wolf Scheduler helps you visualize your practice the way you want. Quickly navigate forward and backward through the schedule by day, week or month; view multiple healthcare provider schedules simultaneously; display schedules by day, week, or month. The application supports the simultaneous view of multiple schedules for a single day; in addition, daily, weekly, and monthly schedules can be viewed for each healthcare provider.

Wolf Scheduler can also be customized for each healthcare provider based on visit length, length of day, as well as 'Time Types' specified for specific days or hours – for example, if a healthcare provider can only see walk-in patients during the morning, his or her morning hours can be specified as "Walk-In."

Wolf Scheduler is completely integrated with Wolf Billing, decreasing front desk data entry by over 50%. We've also included a number of "smart" features, including user prompts, to ensure that information is accurately entered.

"I particularly like Wolf Scheduler and the FrontOffice WorkDesk. I always know where all the patients—and all the doctors—are in the clinic. It's great to be able to message each other; it's also good for tracking what you've done."

Barb Heckadon, Clinic Manager,
Harbourfront Health & Wellness Centre, Toronto ON

"Our doctors' schedules are constantly changing, both with patients canceling or re-scheduling appointments, not to mention the demands on the doctors themselves who can always be called away. Now their schedules are always up-to-date so they can see at-a-glance where they are going to be – they can even view their schedules from home. We also post the Walk-In Clinic schedule for the upcoming week on our Intranet – a schedule that we can create much more easily because we have complete visibility into all the doctors' calendars."

Joanne Sullivan, Office Manager,
Continuum Medical Care, West Vancouver BC

Wolf Scheduler

Overview of Features

Enter data once, see it everywhere.	Fully integrated with Wolf Billing and Wolf Clinical	Scheduled appointments are automatically transferred to Wolf Billing, saving time and increasing billings; physicians can schedule appointments and follow-ups directly from the Physician WorkDesk.
Easily visualize your weekly schedule.	Week-at-a-Glance	See a week-at-a-glance for practitioners and book directly on-screen.
Eliminate the need for multiple scheduling books.	Handles Multiple Schedules	Define multiple groups and quickly toggle between members of multi-disciplinary teams including physicians, nurses, chiropractors, dieticians, podiatrists, and other healthcare providers.
Maximize practice efficiency.	Smart Prompts	Wolf Scheduler will prompt you of any outstanding invoices when booking or arriving a patient. Other smart prompts include double booking, wrong practitioner, patient's next appointment, and prompts for verification of patient demographic data.
See a list of the patient's reasons for visiting before you see them.	Booking Notes	Office staff can enter a presenting complaint and it automatically appears on the schedule and on the Physician WorkDesk.
Review patient information at the click of a mouse.	Patient Maintenance	From any patient gain quick access to complete demographic information, including next of kin, complete billing history, appointment history, referring doctor, outstanding third party or patient bills, and scanned documents.
See and print the reports you need.	Customizable Daysheet Reports	Customize and print daysheets as necessary.
Decrease no-shows and maximize billings.	Track No-Shows	Track patients who do not show up for appointments, cancel less than 24 hours before, or cancel more than 24 hours before their appointments.
Manage schedules your way.	Customize Schedule and Display Options	Customize schedules for each physician based on visit length, length of day, as well as 'Time Types' specified for specific days or hours. Customize the maximum number of physician schedules for on-screen display.
Generate the reports your office manager or accountant needs.	Customize Appointment Reasons	Use optional user-defined colour appointment reasons and default billing or diagnostic codes.
Easily see what types of appointments you will have today.	Find Appointments Not Billed	Helps prevent missed billings. Every appointment from Wolf Scheduler must have a billing status. One missed visit per day per doctor can add as much as \$5000 per year.
Improve office efficiency.	Search by Appointment Reason	Search for the next available appointment by appointment type.
Set schedule functions once.	Perpetual Schedule	Clinic schedules are set up to run continuously until intentionally changed.
Maximize the use of office resources.	Waiting Lists	Create customized waiting lists for practitioners. Customize lists for appointment type and booking notes.
